

Who we are:

XpressTec is a leader in the design and implementation of innovative software solutions found in industries such as manufacturing, call centers, educational, transportation and warehousing.

XpressTec has distinguished itself as being highly innovative with a passion for emerging technologies since its formation in 1999.

We are seeking an individual that is excited to be part of a small highly skilled development team for our centrally located Waterloo office.

Position:

The successful candidate will be developing enterprise software using leading edge Agile Development Methodologies. This will allow the candidate to perform:

- 65% ASP.NET/SQL Server Development
- 15% Application Design
- 15% Report Creation (Crystal, Microsoft Reporting Services)
- 5% Installation Support

The incumbent will start off in a full time contract position with an opportunity for a fulltime position upon completion of the contract.

Essential Skills and Qualifications:

SQL (MS Access/SQL Server 2005)
VS.NET 2005/2008 (ASP.NET and VB.NET)
Crystal Reports (stand alone or part of VS.NET)
Working knowledge of Agile Software Development methodology will be an asset

Core Competencies:

- Ability to research and understand new best of class development and design tools
- Excellent written and verbal communications skills
- Ability to take ownership of a project
- Enjoys constant improvement
- Able to participate in a team environment
- Flexibility to work in an environment that is focused on delivering functionality in a timely manner
- Enjoys the challenge in developing applications which are used by multiple industries

Please forward candidates to:
